Sector Diversification

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

The load returns reflect the 4.75% maximum sales charge for the Class A shares.

Mutual fund performance changes over time and current performance may be lower or higher than what is stated. To obtain current to the most recent month-end performance, call 1-800-253-0412.

Small company stocks may be less liquid and subject to greater price volatility than large capitalization stocks.

The funds are distributed by Unified Financial Securities, Inc. (Member FINRA) a wholly owned subsidiary of Huntington Bancshares, Inc. and an affiliate of Huntington Asset Advisors, Inc. the advisor to the Huntington Funds.

Lipper figures represent the average total returns reported by all mutual funds designated by Lipper Inc. as falling into the respective categories indicated. They do not reflect sales charges.

The S&P MidCap 400 Growth and Value Indices measure Growth and Value in separate dimensions across six risk factors. Growth factors include sales growth, earnings change to price and momentum; and the Value factors include book value to price ratio, sales to price ratio and dividend yield. The regular Style Index Series includes all stocks from the parent index into growth and value components, and weights them by market capitalization. The parent index, the S&P MidCap 400 provides investors with a benchmark for mid-sized companies. The index covers over 7% of the U.S. equity market, and seeks to remain an accurate measure of mid-sized companies, reflecting the risk and return characteristics of the broader mid-cap universe on an on-going basis.

The S&P 400 Mid Cap Index is an unmanaged capitalization-weighted index of common stocks representing the mid-range sector of the U.S. stock market. Investments cannot be made in an index.

Total return represents the value of an investment after reinvesting all income and capital gains. Total returns for less than one year are cumulative. Returns shown are pre-tax. To receive after-tax performance, please call 1-800-253-0412.

The growth of a \$10,000 investment shown is for Class A Shares. Figures reflect the 4.75% maximum sales charge. It assumes the reinvestment of all distributions. Performance for other classes will vary due to differences in charges and expenses.

Effective May 2010, the fund changed its benchmark from the S&P 400 MidCap Index to the S&P MidCap 400 Growth Index.

Funds whose investments are concentrated in a specific industry or sector may be subject to a higher degree of market risk than funds whose investments are diversified. In addition, the Fund may be subject to specific risks of the technology sector, such as obsolescence.
